---

1. How many characters are there in the word "refererf"?

- ☐ A: 7
- ☐ B: 8
- ☒ C: 6
- ☐ D: 9

Izoh: The word "refererf" consists of the letters refererf, totaling seven characters.

2. Is the string "refererf" a palindrome?

- ☐ A: Yes
- ☒ B: No
- ☐ C: "refererf" is not a word
- ☐ D: "refererf" is an acronym

Izoh: A palindrome reads the same forward and backward. "refererf" reversed is "frerefer", which differs from the original, so it is not a palindrome.

3. Which of the following substrings can be found within "ewkfnewf"?

- ☒ A: new
- ☐ B: efw
- ☐ C: fwe
- ☐ D: kfn

Izoh: In "ewkfnewf", the consecutive letters new (positions 567) form the substring "new".

4. What is the total number of distinct alphabetic characters that appear across both words "refererf" and "ewkfnewf"?

- ☐ A: 5
- ☒ B: 6
- ☐ C: 7
- ☐ D: 8

Izoh: The unique letters are {r, e, f, w, k, n}, a total of six distinct characters.

**5. What string results from concatenating the two words "refererf" and "ewkfnewf" without any separator?**

(\*) A:

B: ewkfnewferferf

C: refererf ewkfnewf

[!] D: ewkfnewf refererf

*Izoh: Joining "refererf" directly to "ewkfnewf" yields the continuous string "refererfewkfnewf".*
